DESIGNER

PORTFOLIO

Katarina Riesgo Stropkova

Research-Led Product Designer

This document is the single source of truth for all visual decisions governing Katarina's portfolio. It covers the complete brand system — colour tokens, typography, logo specifications, favicon requirements, and image treatment standards. All designers and developers working on this portfolio must reference this document before making any visual decision.

FRAMEWORK	Astro — static output only
CSS	Vanilla CSS + custom properties. No Tailwind, no CSS-in-JS.
FONTS	Google Fonts — Cormorant Garamond + Jost only.
HOSTING	GitHub Pages
FORMS	Formspree, Fetch API POST only.
ICONS	Inline SVG only. No icon libraries.
ANIMATION	Vanilla JS only. No GSAP, no Framer Motion.

02 Colour Palette

BRAND COLOURS

Six tokens. Never introduce values outside this set.

Deep Tide

#1C2B3A

Primary dark surface

Warm Canvas

#F7F6F2

Page background

Linen

#EAE9E4

Secondary surface

Teal

#2BA5A5

Primary accent

Dusty Rose

#D4797A

Secondary accent

Slate

#6B7A8D

Secondary text

COLOUR RULES

Never use pure white #FFFFFF as a background

Use Warm Canvas #F7F6F2 or Linen #EAE9E4 always. Pure white breaks the warm tone of the site.

Slate is light-surface only

#6B7A8D must never appear on Deep Tide backgrounds. Use #A8B5C2 for secondary text on dark surfaces.

Rose is never used as body text

#D4797A is decorative and interactive only — buttons, accents, logo dot, required field asterisks.

No off-brand accent colours in images

Annotations, highlights, and diagram elements must use Teal #2BA5A5, Rose #D4797A, or Deep Tide only.

TWO FAMILIES ONLY

Cormorant Garamond for editorial and display. Jost for all UI, body, and labels. No other typefaces. No other weights than those listed below.

Cormorant Garamond 300

Headlines · Case study titles · Pull quotes · Persona names

Cormorant Garamond 300 Italic

Subtitles · Quote text · Decorative editorial moments

Jost 400

Primary body copy · Navigation · Button labels

Jost 300

Secondary body · Captions · Form field text

JOST 500 — EYEBROW LABELS

Section labels · Field labels · Meta categories · Tags

TYPE SCALE

CSS tokens: font families are referenced as `--font-serif` (Cormorant Garamond) and `--font-sans` (Jost). Eyebrow label style is `--text-eyebrow`. Caption style is `--text-caption`.

ROLE	FAMILY	WEIGHT	SIZE	TRACKING
Page headline	Cormorant Garamond	300	32–40px	0.02em
Section heading	Cormorant Garamond	300	22–28px	0.02em
Pull quote	Cormorant Garamond	300 Italic	15–18px	0
Body primary	Jost	300	15–16px	0
Body secondary	Jost	300	13–14px	0.04em
UI / nav	Jost	400	12–14px	0.04em
Eyebrow label	Jost	500	9–10px	0.20em

Caption

Jost

300

9–12px

0.08em

LOGO FILES

FILE	USE CASE	STATUS	NOTES
Logo.svg	Favicon source, general use	✓ Correct	Transparent bg. All brand colours correct.
logo-mark.svg	Nav, small contexts	✓ Correct	48×48 viewBox. Transparent bg.
logo-abbr.svg	Mark + KRS abbreviation	✓ Correct	Text colour #1C2B3A. Transparent bg.
logo-full.svg	Full wordmark	Empty — needs re-export	File contains no path data. Re-export from Figma.

MARK ANATOMY

The mark is a water drop (Deep Tide #1C2B3A) containing a teal ellipse ring (#2BA5A5, stroke only) and a rose circle dot (#D4797A, fill). These three elements map directly to the brand colour system — structure, accent, identity.

Minimum size

Never render the mark below 24×24px. Below this the teal ring and rose dot become indistinct.

Clear space

Maintain clear space equal to the rose dot diameter on all four sides of the mark.

Dark surface use

On Deep Tide backgrounds, the mark renders correctly — the drop disappears and the ring and dot float. This is intentional.

Never recolour

The three mark colours are fixed. Do not apply the mark in a single colour, greyscale, or inverted.

FAVICON FILES

FILE	FORMAT	SIZE	PURPOSE
favicon.ico	ICO	32×32 + 48×48	Desktop browsers — legacy fallback
favicon.svg	SVG	Scalable	Modern browsers — scales to any size, supports dark mode
favicon-96x96.png	True PNG	96×96	Desktop browsers — standard size
apple-touch-icon.png	True PNG	180×180	iOS home screen. Background: Warm Canvas #F7F6F2
web-app-manifest-192x192.png	True PNG	192×192	Android home screen — manifest icon
web-app-manifest-512x512.png	True PNG	512×512	Android splash screen

WEBMANIFEST

FIELD	VALUE
name	K·R·S
short_name	Katarina
theme_color	#1C2B3A (Deep Tide)
background_color	#F7F6F2 (Warm Canvas)
display	standalone

TWO IMAGE CONTEXTS ONLY

Every image in the portfolio falls into one of two categories. The treatment is determined by context, not by content.

WORK CARD THUMBNAIL

Left panel of work cards on the homepage index.

Dimensions	680×510px (4:3 ratio)
Background	#EAE9E4 Linen
Frame	Deep Tide browser chrome + 8px inset
Padding	24px all sides (--space-6). Min 16px (--space-4) between any element and edge.
Crop	Hero section only — object-fit: cover, object-position: top center
Border radius	12px (--radius-lg) — matches card
Export	PNG 2× or WebP 85%

INLINE CASE STUDY IMAGE

Between paragraphs in case study pages. Always full width.

Max width	900px (full content width)
Background	#EAE9E4 Linen frame, 24px padding
Frame	border-radius: 12px, 0.5px border rgba(28,43,58,0.08)
Label	Teal eyebrow (--text-eyebrow) above image with gradient rule
Caption	Jost 300, 9px, Slate #6B7A8D (--text-caption) — below the frame
Export	WebP 85% at 1800px wide (retina)

HARD RULES FOR EVERY IMAGE

SHADOW	TOKEN	VALUE
Header	--shadow-header	0 1px 0 rgba(28,43,58,0.08)
Card	--shadow-card	0 2px 12px rgba(28,43,58,0.06)
Overlay	--shadow-over lay	0 8px 32px rgba(28,43,58,0.24)

Never pure white backgrounds

Use #F7F6F2 or #EAE9E4 always. #FFFFFF breaks the warm canvas tone.

Annotations in Teal only

Callout lines, highlights, and markers must use #2BA5A5. Never red, orange, or off-brand colour.

One shadow level

Never nest shadows. If the card has a shadow, elements inside must not also have shadows.

Font consistency in graphics

Any text visible in images — labels, annotations — must use Jost at 300 or 400 weight only.

OUTSTANDING BEFORE LAUNCH

01 **logo-full.svg — re-export from Figma**

The file is empty. Open the original Figma file, verify all layers are visible, delete any background rectangle, export as SVG. Verify in browser before replacing.

02 **site.webmanifest — two field edits**

short_name is currently "MySite" — change to "Katarina". theme_color is "#ffffff" — change to "#1C2B3A". Save and redeploy.

03 **Personas artifact — rebuild in Figma**

Current Personas.png is a working document export. Rebuild with brand tokens: Warm Canvas background, Cormorant Garamond for names and quotes, Jost for all labels, Teal pull quote borders, Slate eyebrow labels. Bridge treatment (CSS frame) is acceptable for launch.

04 **Hook paragraph — case study gate**

The opening hook paragraph for the Required Field Indicator gate is placeholder text. Katarina must write the actual 3-4 sentences that end mid-thought so the fade-out feels natural.

05 **Retina image exports**

All inline case study images should be exported at 2x resolution. At 900px max-width, export at 1800px wide as WebP at 85% quality.
